

North Fond du Lac School District: A Failure of State Funding

One Side of the Coin: Fair Funding for Schools

Wisconsin school districts have limited control over the amount of money they have to educate their students. Since 1993-94, the state government has imposed limits on the revenue school districts can receive from their two main funding sources: local property taxes and state aid.

The pie chart shows funding sources in North Fond du Lac. Sixty-Six cents out of every dollar

are constrained by the state's revenue limits. Although the school district has some discretion over its *other local revenue*, the amount it receives in federal and other state aid is out of its control.

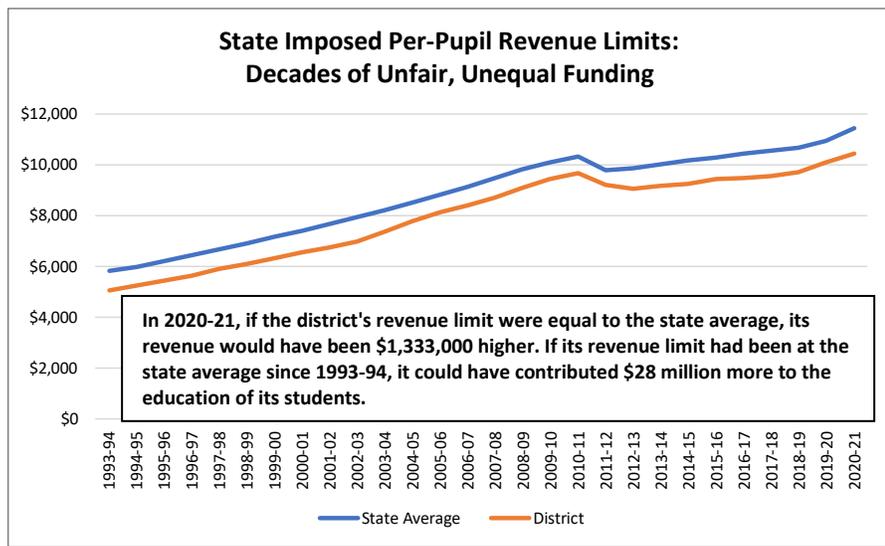

In 1993-94, the revenue limit in North Fond du Lac was set at \$5,047 per student, \$770 below the state average of \$5,817. In the same year, 24 school districts were allowed to have revenues

of over \$7,500 per student! Funding gaps have only grown worse.

Revenue limits in North Fond du Lac have remained well below the state average every year since 1993. In 2020-2021, its revenue limit is \$10,446 per student, about \$1000 below the state average of \$11,445 per student.

New federal funding in 2021 will help with pandemic-related costs, including learning losses. But these funds only last for a few years. We need long-term improvements in fair funding.

These unfair funding gaps will continue unless the legislature takes steps now to reform the state's school funding system.

The Other Side of the Coin: Adequate Spending to Meet Student Needs

The amount of money North Fond du Lac spends to educate its students is constrained by its available funds. Given its low per pupil revenue limit, North Fond du Lac has had to rely on local revenue to attain spending of \$11,837 per student, close to the state average of \$11,930. This level of spending was made possible through local spending referenda. **In other words, local property taxpayers have had to step up because the state is not fairly funding your schools.**

North Fond du Lac not only faces the challenge of limited revenues. Its student body includes a large concentration of *high-need* students.

- 47% of students are from low-income families.
- 19% of students have disabilities requiring extra services.
- 10% of students are learning English at school.

Providing high-need students with a quality education requires additional resources.

The state's funding system mostly disregards extra costs of educating high-need students.

- Wisconsin is one of only a few states that does not provide extra aid for students from low-income families.
- State aid covers only 28% of the extra costs to provide special education services.
- North Fond du Lac receives no additional state aid to provide English language instruction.

To provide an adequate education to all its students, one that meets the state's academic performance standards, AEF estimates that North Fond du Lac will need to increase spending by at least \$3,646 per student. At the current level of enrollment, this increase implies a **spending gap of \$5.1 million**. We base this on a conservative estimate of 40% higher costs for these students.

AEF calls on the state legislature to close unfair funding gaps and recognize the additional costs incurred by districts serving high-needs students. Specifically, AEF proposes:

- Raising low revenue limits by \$300 per year, and closing gaps for low-revenue districts.
- Raising special education reimbursement to 45%, then 55% of actual costs.
- Providing \$150 of additional state aid per low-income student.
- Providing "Bilingual/Bicultural Aid with a floor of \$10,000 and \$500/student.

Please join AEF's call for fairness. Contact your state legislators today and ask them for equal funding for the students in North Fond du Lac.

Data in this Dashboard are from WI DPI Revenue Limit Longitudinal Data, School Report Card Data Downloads, 2019-20 student "membership" counts, and Comparative Revenue and Comparative Cost files. Dr. Andrew Reschovsky (LaFollette School of Public Affairs, UW-Madison) assisted in the analysis of the data. All averages are pupil weighted. Spending is defined as "Total Current Education Costs."
